

MUNSTER GPS

SECURITY - SURVEILLANCE - PEACE OF MIND

SMS TRACKING QUICK INSTRUCTIONS (recommended)

When using for the first time make sure the battery has been fully charged overnight and the tracker is outdoors in full view of satellites. If it has a satellite signal the blue light will be flashing

Open the 4 screws with the screwdriver provided and install the SIM card with the gold part facing down.

1) Turn the unit on outdoors using the Green button and wait for 2 minutes to initialise.

2) Send text to tracker **admin123456 087666666**

Replace the number 087666666 with your own mobile phone number. This makes you the tracker administrator to receive alerts.

3) Send text to tracker **sleep123456 shock**

This will place the tracker in sleep mode until tracker is moved to save battery.

4) Send text to tracker **sos123456 087666666**

Replace 087666666 with the number you want to have alerted when the Red SOS button is pressed.

Ready to go !

Call the unit any time and you should hear a busy tone. You will then receive a text from the tracker with :

Current date and time and speed in Km

Battery Remaining in %

Link that takes you to Google Maps and shows you the position of the tracker.

Other features:

Feature Name	Command	Example	Cancel Command
Shock Alarm	shock123456		noshock123456
<i>Shock alarm alerts your phone with a text whenever the tracker moves (shaken)</i>
